BULLETIN

**MEMBERSHIP FEES ARE NOW DUE –
FAMILY \$18, SINGLE \$15 AND \$10 EXTRA IF
YOU RECEIVE BULLETIN BY POST. FEES
MAY BE PAID BY POST, AT THE MEETING OR
BY DIRECT DEPOSIT TO BSB 062 155
A/C 00906498 PLEASE LEAVE YOUR NAME
AS A REFERENCE. PLEASE PAY PROMPTLY.**

GUEST SPEAKER. This month we have **Gary Hart** who will be giving a talk on **bulbophyllums**. With nearly 3,000 species, this is one of the largest genera in the orchid family. It has widespread distribution mainly in the tropics but also extends to temperate zones. Gary will cover some that are suitable to grow in cool to intermediate conditions.

SUPPER ROSTER. This month our volunteers are **Phil Gardiner** for sandwiches and **Francis Lee** for something sweet. Thank you to those who brought in something extra for the supper table last month.

11th ORCHIDS BY THE SEA SHOW

Time to get those plants ready so we can put on a big show for the public. Set up is on Thursday 3rd August. We will need help in getting plants upstairs from 9am to 12pm. Then your benching plants and sale plants may be brought in from 12pm. Judging will be from 7pm. Floral Art may be benched on Thursday afternoon or by 11am on Friday. Judging will be at 11.30am on Friday. Help will be needed over the three days with sales, raffle sales, door, security etc. This is your big show for the year so please volunteer some of your time to help out.

ST. IVES ORCHID FAIR 18-20TH AUGUST.

We need your plants for our display. We realise that some members belong to other societies and usually place their plants in that display but it would be nice if you could spare a few plants for us. Set up is on Thursday from approx. 9am so could you please have your plants there early. Also please make sure you fill in the plant list to assist with the judging. The list is included with this Bulletin.

PRESIDENT'S REPORT

Orchids by the Sea is just around the corner, and more now than ever it is important to start grooming your plants! Novices, we have another meeting before the show so if you have questions don't forget to ask.

In the past, we have typically had an exceptional quality of plants benched at this show, with many plants having been awarded, and I am hoping this year will be no exception.

I look forward to seeing you all again soon,

Dylan

LIBRARY. The library still operates so please make use of this facility as we have some very good books.

SALES TABLE. Honest Gary has pots in all sizes and also plant labels. Please bring in your excess plants for sale.

Bulletin Articles – The Ed is always on the lookout for news articles so if you have anything to buy, sell or tell please contact Tinka.

.DIARY DATES 2017

July 27th Member's Meeting

August 4,5,6 ORCHIDS BY THE SEA

August 11-13 National Orchid Extravaganza,
1 Pellitt Lane, Dural.

August 18,19,20 St. Ives Orchid Fair

September 14,15,16 DY Grand Spring Show

September 30-Oct. 1 – NSW Clivea show,
Thornleigh Community Centre, Phyllis Ave.
(next to Bunnings).

October 6-8 Southern Orchid Spectacular,
Carringbah High School.

October 26th Member's Meeting

November 12th AUCTION

November 23rd Member's Meeting

December 3rd Christmas Party

December 21st Member's Meeting

Show Marshal Report June 2017

**Hybrid of the Month : Rlc (Blc) Dream
Trader 'Colossus'**

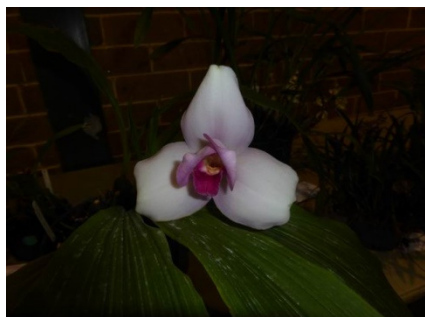

Grown by: Gloria & Allan Cushway

This a very nice clone, with many plants carrying 24 awards, was registered in 1990, bred from Rlc.

Sylvia Fry X C Horace which are both two fine plants and have produced many fine off spring. In the back ground of Dream Trader there are nine species, where the good characters come from. There are 40 1st generation crosses from the above plant and 65 total progeny. Not being there to see but by the photo, it was good large flower. Well done Gloria and Allan

Specie Plant of the Month : "Lycaste virginalis" (SYN) Lycaste skinneri
(Scheidw.) Linden, Lindenia 4: 22 (1888).
Grown by: Guy Cantor

This is a nice form of this species, and is quite variable, from pinks to pure white and shape varies as the petals furl back to a degree.

Orchidwiz has

113 photo's to compare. It comes from *El Salvador, Guatemala, Honduras, and Mexico*. *Lycaste skinneri* is found at 5000-7000 ft. (1524-2134 m) in the province of Alta Verapaz, Guatemala. This is a region of cool, humid mountain cloudforests where *Lycaste skinneri* grows in the forks of trees, or on large, moss-draped tree branches. It is also found in similar habitats in the state of Chiapas, Mexico, in the Dept. of Santa Barbara, Honduras, and on Volcan Chingo near Chalchuapa, El Salvador. from Orchidwiz. Note by above its habitat the height it grows at cool growing this above the condition to grows at I have one I got from York Meridith Nursery Cromer many years ago mid 70's, it was a wild plant he brought in from over there it is good these are worth having a go at.

Specimen Plant of the Month :
"Bulbophyllum shepherdii"

(syn) **Bulbophyllum crassulifolium** Muell.) Rchb.f., Beitr. Syst. Pflanzenk.: 52 (1871).

Grown by: Ralph Lumby

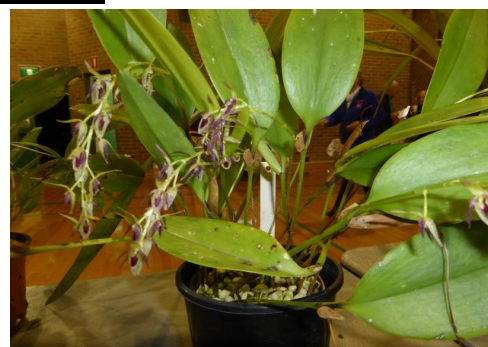

A nice grown plant by Ralph, the name I was given started with g not c something to watch writing tags with new plants also make sure it is spelt right and I see this quite often doing reports. This plant I checked out and is correct but it is a nice grown plant hard to see the flowers in the photo due to size. It is from *Australia*. This epiphytic or lithophytic orchid is distributed from southeastern Queensland where it is very

common to near Illawarra southeastern New South Wales. It is found on trees and rocks in rainforest and in moist areas of open forest, particularly in gorges and along streams and ranges from the lowlands to about 3300 ft. (1000 m). Plants are sometimes found in very exposed situations where they are bleached almost yellow. From Orchidwiz Natives like this can give a lot of satisfaction and work out what that specie needs to grow, this applies to most orchids and what is growing in or on a good rule is when you find the place in your place, grow it there, as all yards are different due to location, trees, sun, air movement, and shade, how close to the lakes and water affects temperature as some locations can go very low to frost I saw this in the low part of Cromer.

Novice Plant of the Month: "Pleurothallis loranthophylla" (Syn)

Pleurothallis navicularis Rchb.f., Bot. Zeitung (Berlin) 10: 674 (1852).

Grown by: - Sheree & Michael Howard

By the names above Pleurothallis navicularis was named in 1858 by Lind so the 1st date applies it has 10 different names given to it over time but also it is what Kew says also. Pleurothallis is a large group of orchids from the Americas numbering 636 named species a lot to know about. This comes from *Costa Rica, Panama, Colombia, Venezuela, Guyana, Ecuador, Peru and Bolivia* in wet montane forests and piedmont forests at elevations of sea level to 2100 meters. from Orchidwiz. There are some very interesting species in the group also allied to Masdevallia, some flower off the end of the leaf, not like this one on a spike most are cool shady growing

A REQUEST FROM GUY CANTOR

I am looking to get more jars for my flasking so I am going to ask if members could save used jars and lids for me. The type of jar are those with metal lids which have pasta , curry and other sauces. A typical picture is below.
